DUST DETECTOR

Order no.: DUST_DETECT_xxxx

(xxxx specifies the max. negative size)

HEILAND VISION GERMANY GMBH

With our new dust detector, dust becomes visible like stars in the night sky. It is a useful tool to detect dust on negatives, as well as on negative carriers.

The dust detector supports the user in removing specks of dust on these components and considerably lessens the time spent retouching the final image.

With the help of directional light, dust particles literally light up. This makes the precise removal of individual dust grains very easy.

Due to its wheels, the dust finder can easily be moved over all areas of a negative. This convenient feature is especially useful for working on large-size negatives.

BENEFITS FOR THE USER

- Secure and fast dust detection
- Both the negative and the carrier can be cleaned at the same time
- Simplifies print retouching
- Three compact models for different negative sizes available

TECHNICAL DATA

Power supply	12 V DC, wall plug power adapter is included in the scope of delivery
Light source	LED cold white 6000 Kelvin
Weight of 4x5 inch version	0.3 kg
Available sizes	Up to 4x5 inches, up to 10x10 inches or up to 20x24 inches
