# CONTROL OF THE LED COLD LIGHT SOURCE VIA THE HEILAND SPLITGRADE SYSTEM

Order no.: LED_CTRL_SPLIT

A small control unit connects your Splitgrade with the 24 V power supply unit and the LED cold light source head.

Control of the LED cold light source and determination of the operation mode (light color, paper grade, dimmer, etc.) is carried out centrally via the already existing Splitgrade control unit. In case you do not own a Splitgrade, please add order no. 'SPL-C1' (Splitgrade without module') to your basket.

Existing Splitgrade controllers have to be of the latest state of revision regarding hardware and software.

Please ask at info@heiland-vision.com to find out if and to which extent modifications are necessary.
