## **SPLITGRADE COMFORT OPERATING UNIT**

**ORD. NO.: SPL-COMF**

Easy to handle operating unit as an add-on for the Splitgrade controller

Exposure, gradation, and post-exposure times are conveniently adjusted through rotary knobs and large red numerical displays with SPLITGRADE COMFORT.

Pushbutton functions enable quick control of the focus light and exposure sequences.

This allows you to control the most important SPLITGRADE functions even faster.

The integrated tonal value display enables positioning of tonal values for portrait pictures and enlargements with limited tonal range.

SPLITGRADE COMFORT is simply connected to the controller. The elaborated menu control of the Splitgrade controller can of course further be used for extended tasks. The foot switch can also be connected to the COMFORT operating unit.
